Gorillas!

Gorillas are the largest of all mammals. A male gorilla can be 180 cm tall and weigh 200 kg. Gorillas are very strong but they do not often fight. In fact, they are peaceful animals. Gorillas live in small family groups of about fifteen. In a group there is one strong, older male, some young males and a few females with their babies. They move slowly round a large area of jungle eating leaves and bushes.

In some ways gorillas are like humans. When they are happy, they laugh and wave their arms. When they are angry, they beat their chests. When they are sad, they cry. But they cry quietly, without any tears. Unfortunately, people hunt and kill gorillas. They also cut down and burn their trees. There are now only about 10,000 gorillas left in the world.
